Installation Steps of SkynetAccessibility Video Subtitle for Magento

Step 1: Download the Extension

Visit the Magento Marketplace using the link below:

https://marketplace.magento.com/ skynet-technologies-usa-llc-module-skynetaccessibility-video-subtitle.html

Click Add to Cart, complete the checkout process, and download the extension.

Step 2: Install the Extension via Composer

Navigate to Magento project root folder using the command line and run:

- **composer require skynet-technologies-usa-llc/module-skynetaccessibility-video-subtitle**

After installation, verify the module inside the vendor/skynet-technologies-usa-llc folder.

Step 3: Enable the Module.

Run the following command to enable the module:

- **php bin/magento module:enable Skynettechnologiesusallc_videosubtitle**

Step 4: Execute the following command from the Magento project root folder:

- **php bin/magento setup:upgrade**

This updates the database schema.

Step 5: Compile Dependency Injection (If Required)

If Magento store is in production mode, run:

- **php bin/magento setup:di:compile**

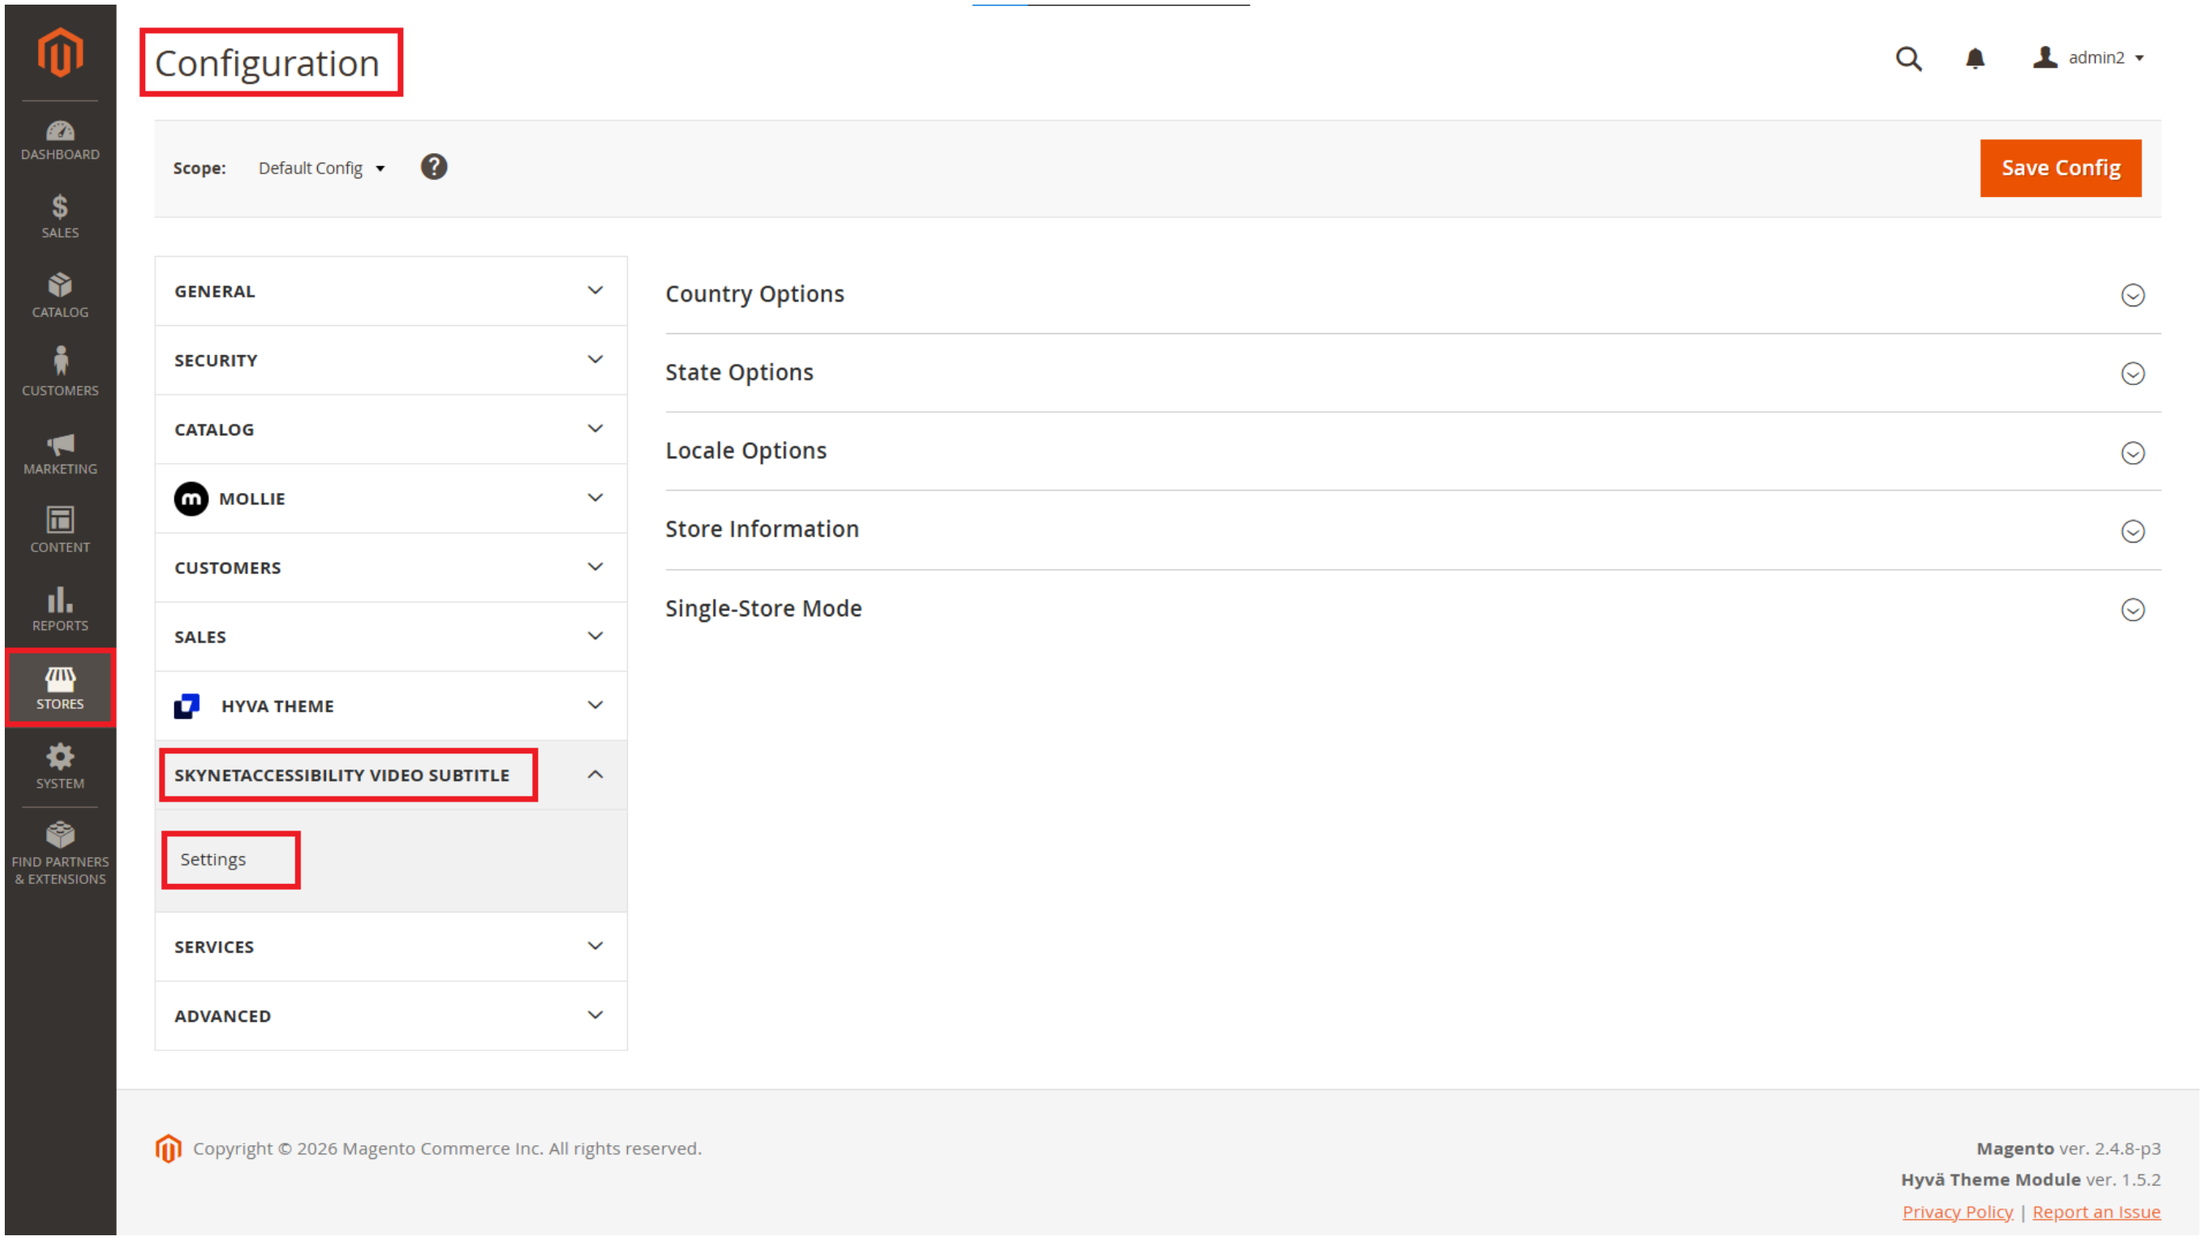

This complies necessary classes for proper execution.

Step 6: Clear Cache: Clear the Magento cache from the admin dashboard or run:

- **php bin/magento cache:clean**

Step 7: Installation Complete: The SkynetAccessibility Video Subtitle extension is now successfully installed on your Magento store.

Step 8: Configure the extension: Go to Stores → Configuration → SkynetAccessibility Video Subtitle → Settings**.**

Step 9: Generate Video Subtitle Report: The extension will automatically generate synchronized subtitles for videos in 50+ languages and provide a detailed report of the videos processed.
